MOHAMMED KHADER VALI

Aspiring Software / Cloud / AI Engineer | B.Tech (AIML), Final Year

9014293637 | immu5744t@gmail.com | Kakinada, Andhra Pradesh

LinkedIn: linkedin.com/in/mohammed-khader-vali-b950a0382 | GitHub: github.com/immu5744t

PROFESSIONAL SUMMARY

Final-year B.Tech student in Artificial Intelligence and Machine Learning with hands-on experience in software development, cloud computing, Generative AI, and Data Structures & Algorithms (DSA). Skilled in Java, Python, Google Cloud Platform (GCP), and modern web technologies. Passionate about building AI-powered solutions and solving real-world problems.

TECHNICAL SKILLS

Programming Languages: Java, Python
Web Technologies: HTML5, CSS3, JavaScript, PHP
Cloud Technologies: Google Cloud Platform (GCP)
Tools: Git, GitHub, VS Code
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Machine Learning

EDUCATION

Bachelor of Technology (B.Tech) – Artificial Intelligence & Machine Learning
Aditya College of Engineering and Technology (Autonomous)
2024 – 2027 | CGPA: 7.0

Diploma in Computer Engineering
KAKINADA INSTITUTE OF ENGINEERING AND TECHNOLOGY (KIET)
2021 – 2024 | 77.85%

Secondary School Certificate (SSC)
SRI RAM PUBLIC SCHOOL
Till 2021 | CGPA: 7.47

INTERNSHIPS

Java & Python Intern | Microchip Solutions Nov 2023 – Apr 2024

- Completed an internship focused on Java and Python programming.
- Gained practical exposure to Java and Python development and coding.
- Applied programming concepts through hands-on technical tasks.
- Strengthened problem-solving and programming skills.

AWS Cloud Computing Intern | APSSDC May 2025 – July 2025

- Acquired practical knowledge of cloud computing concepts, AWS services, and deployment models.
- Gained hands-on exposure to AWS cloud infrastructure, including EC2, S3, and IAM.
- Developed an understanding of cloud-based application deployment, storage, and modern computing environments.

Google Cloud Generative AI Intern | SmartBridge May 2026 – July 2026

- Explored Generative AI concepts using Google Cloud technologies.
- Worked with Gemini models, Vertex AI, and Prompt Engineering.
- Built AI-powered applications using Google Cloud services.

PROJECTS

OptiCrop: Smart Agricultural Production Optimization Engine

Developed an AI-powered web application for crop recommendation using Machine Learning. Built a Flask-based application that predicts the most suitable crop based on soil nutrients (N, P, K), temperature, humidity, pH, and rainfall. Implemented data preprocessing and a Decision Tree model to generate real-time crop recommendations through an interactive web interface.

Blood Bank & Donor Management System

Developed a web-based blood donation management system for hospitals and donors. Implemented donor registration, blood inventory, and blood request management. Integrated MySQL database with a secure and user-friendly interface.

Work Wagon – Local Job Matching Platform

Developed a responsive web platform connecting job seekers with employers. Implemented authentication, job posting, and application management features. Built a secure backend with efficient database integration.

CERTIFICATIONS

- Google Cloud Computing – APSSDC
- Google Cloud Generative AI – SmartBridge
- Java & Python Intern – Microchip Solutions

ACHIEVEMENTS

- Solved 150+ coding problems across LeetCode and GeeksforGeeks.
- Earned 3★ in Java and Python on HackerRank.
- Developed 3+ Web and AI Projects.
- Participated in hackathons, coding contests, and technical workshops.
